

PRINCE PSALM VIVAZ

Antipolo City, Rizal, Philippines | +63 999 664 3299 | vivazprince@gmail.com
github.com/EngrPrenz

PROFESSIONAL SUMMARY

Computer Engineering undergraduate specializing in full-stack development and quality assurance, with hands-on experience building secure, multi-role platforms using Laravel and Firebase. Skilled in validating access control, session integrity, and real-time data synchronization across multiple deployed production systems, with a strong eye for edge cases and system reliability.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), PHP, SQL, HTML5, CSS3, C#

Frameworks & Databases: Laravel, Blade, Node.js, REST APIs, Firebase, MySQL

QA & Engineering: Functional Testing, Boundary-Value Testing, RBAC & Access Control, Input Validation, Git/GitHub

TECHNICAL PROJECTS

AR-DUINO — AR Interface for Microcontrollers | *Lead Systems & AR Developer*

Live site: <https://ar-duino-website.vercel.app>

- Led design and development of a Unity 3D augmented reality application that overlays interactive pinout diagrams directly onto physical microcontroller hardware.
- Tested camera tracking latency and spatial anchor stability across varied lighting conditions to ensure reliable AR overlay performance in real-world use.

URSAC Hub — Campus Organization & Marketplace | *Full-Stack Developer & QA*

Live site: <https://ursachub.onrender.com>

- Built a Laravel-based platform enabling campus event publishing and relational inventory tracking for organization-managed marketplace listings.
- Designed and verified role-based access control (RBAC) and session management to prevent privilege escalation across user roles.

Salo sa Antipolo — Restaurant Operations & POS | *Full-Stack Developer & Tester*

Live site: <https://salo-sa-antipolo.web.app>

- Developed a multi-role kiosk application with real-time Firebase-backed views for staff operations and billing workflows.
- Validated order-state synchronization logic and resolved edge cases arising from simultaneous order placement to eliminate race conditions.

Grind On — Sportswear E-Commerce & POS | *Web Developer & QA Tester*

Live site: <https://grindon-da126.web.app>

- Developed a responsive e-commerce storefront for apparel sales with an integrated point-of-sale workflow.
- Conducted cross-browser usability testing and boundary-value testing to identify and resolve edge-case defects before deployment.

EDUCATION

Bachelor of Science in Computer Engineering

University of Rizal System | Expected Graduation: 2027

Relevant Coursework: Database Systems, Software Design, Computer Networks, Data Structures & Algorithms
